

# FlexTile™

## INTERLOCKING RUBBER TILES

### Buffings:

Pigmented using organic powder color coating methods that will not delaminate over time. Sealed with specially formulated polymer agent that bonds pigments into the rubber.

### EPDM:

Gezoflex EPDM granules are used to create options from bright solids to special blends for specific color themes. Mixtures includes a vibrant 90% EPDM/10% black mesh for standout solids, a 50/50 mix with black mesh, and mixtures with up to 3 EPDM colors. Ask your rep about specific blends to cover your space needs.
